Generating set

INVERTER PRO PORTABLE POWER GENERATING SET.

1 Is the fuel level high enough?

yes
go to question 2.

no
Using a funnel and a jerrican, fill with fuel. Make sure that the filter stays in place during this operation!

2 Are the petrol switch and tap open?

yes
go to question 3.

no
Set the switch to 1 and open the tap.

3 Is there enough oil in the engine?

yes
go to question 4.

no
With a funnel, add oil up to the mark indicated on the casing.

**INVERTER PRO PORTABLE POWER
GENERATING SET.**

4 Is the spark plug in good working order?

yes

go to question 5.

no

Use a spark plug wrench to replace the spark plug.

5 Does the petrol reach the carburettor?

yes

your genset
is ready for
start-up.

no

Check using a flat screwdriver. If the petrol does not reach the carburettor,
return your genset to the ASS.
