

### PRO 2000

Generating set

INVERTER PRO PORTABLE POWER GENERATING SET.

#### 1 Is the fuel level high enough?

**yes**  
go to question 2.

**no**  
Using a funnel and a jerrican, fill with fuel. Make sure that the filter stays in place during this operation!

#### 2 Are the petrol switch and tap open?

**yes**  
go to question 3.

**no**  
Set the switch to 1 and open the tap.

#### 3 Is there enough oil in the engine?

**yes**  
go to question 4.

**no**  
With a funnel, add oil up to the mark indicated on the casing.

## @PRO 2000

Generating set

**INVERTER PRO PORTABLE POWER  
GENERATING SET.**

### **4** Is the spark plug in good working order?

**yes**

go to question 5.

**no**

Use a spark plug wrench to replace the spark plug.

### **5** Does the petrol reach the carburettor?

**yes**

your genset  
is ready for  
start-up.

**no**

Check using a flat screwdriver. If the petrol does not reach the carburettor,  
return your genset to the ASS.
