**PRESTIGE PORTABLE POWER
GENERATING SET.**

1 Is the fuel level high enough?

yes

Go to the next question.

no

Using a funnel and a jerrican, fill with fuel. Make sure that the filter stays in place during this operation!

2 Are the petrol switch and tap open?

yes

Go to the next question.

no

Set the switch to ON and open the tap.

3 Is there enough oil in the engine?

yes

Go to the next question.

no

With a funnel, add oil up to the mark indicated on the casing.

**PRESTIGE PORTABLE POWER
GENERATING SET.**

4 Is the spark plug in good working order?

yes

Go to the next question.

no

Remove the side cover with a tube wrench. Use a spark plug wrench to replace the spark plug.

5 Does the petrol reach the carburettor?

yes

Go to the next question.

no

Remove the cover with a tube wrench. Check using a flat screwdriver. If the petrol does not reach the carburettor, return your genset to the ASS.

6 Is the switch properly engaged?

yes

Your genset
is ready
for start-up.

no

Engage the switch.
